I have the iHome Wireless 5 button laser mouse model iH-M130'R and I can't find the drivers to be able to program the buttons. By default, left/right/scroll clicks work, but I can't get any response from other buttons. Does anyone know about the program or the drivers that will allow me to use these other buttons? Even just being able to use the side buttons for back/forward in browsing would be great. iHome Keyboard and Mouse Driver is a Shareware software in the Miscellaneous category developed by LifeWorks Technology Group.The latest version of the iHome Keyboard and Mouse Driver is currently unknown.
